SongWriters Collection Vol. 2 is sonorous, colorful and highly playable sounds that are especially suited for songwriting in music genres of rock, R & B, folk, pop, jazz, new age and film music.

The sounds are created in series, so that different versions of a sound may lie after another - but each with their own expression and mood, and often with new layers or effects added. A few of the sounds are modifications of Motif XS preset voices, but most are new unique sounds.

All sounds are programmed with specific controller settings (on my Motif XS), typical for the ASSIGN 1 and ASSIGN 2 buttons and the modulation wheel. This pre-programming allows you to add various twists and tonal characters changes to the basic sounds. On the following pages you will find a data list of the 384 voices in *SongWriters Collection Vol. 2*.

About the creator of the sounds

My name is Per Skovgaard, I live in Denmark and since 1976 I've had a passion for creating new sounds and soundscapes on a synthesizer - funky, rocking, expressive and always evocative voices, which I myself think is a dream to play on.

When I create voices, I always do it in series. Instead of just picking one sound from each series, I have chosen to give you all the best sounds from the series.

Much energy and many hundred hours of effort are put into creating the *PSC Songwriters Collection Vol. 2* soundset, so I hope it will be useful and inspiring for you. Enjoy using the voices!
