

Upmatic® 4125

english

Upmatic 4125 = fully-automatic filling and closing machine for paper bags with or without handle from 5 kgs to 25 kgs filled weight. Suitable for all bulk and granular products from the food and non-food industries.

The Upmatic 4125 is extremely rugged and easy to operate. The paper bags are taken from a magazine and are conveyed under the fillinghopper. They are opened pneumatically, filled and by passing the vibration system under the hopper the product is evenly spread in the bag. After the filling, the bag is pneumatically closed, sewn up and conveyed.

All adjustments to different bag sizes can easily be carried out without tools.

An industrial sewing machine, collecting belt and vacuum pump are supplied as standard equipment. Combination with all common weighing and dosing equipment is possible.

In our customers' interest, we reserve the right to introduce technical changes.
