

Ground breaking innovation in the range of G.Mondini tray sealers wch offers the capability to produce multiple packaging formats on a single tray sealer through a simple tool change. This market leading technology secures decision making by giving producers the flexibility and technology to meet changing consumer demands in a single investment.

Mechanical:
reliable consistent powerful

Years of proven top quality performances demonstrate how our mechanical seal force generator is the best solution for trays sealing.
Cycle after cycle, year after year it generates several tons of sealing force with unbeatable consistency and reliability.
Maintenance is a mere matter of greasing, which is handled by a centralized system.
The unique power of our system delivers outstanding performances in terms of low sealing time and seal through contamination granting the best possible seal result.

Simplicity
is troubleless.

Tools are the most stressed and the most sensitive part of a tray sealer. That's why we made it as simple as possible reducing the number of moving parts and the amount of components.
Most important, we completely eliminated the need of air actuators and the use of multi heating elements to increase the reliability and the ease of maintenance, which simply becomes a matter of blades and easy access seals replacing.

Cleverly engineered allowing easy access for efficient maintenance.

Designed to exceed the highest hygiene standards.

All electrical components secured in top cabinet.

Motors in stainless steel with smooth surfaces.

Ergonomically designed electrical cabinet for highest hygiene standards.

Simple cleaning procedures.
