upmatic® 2715
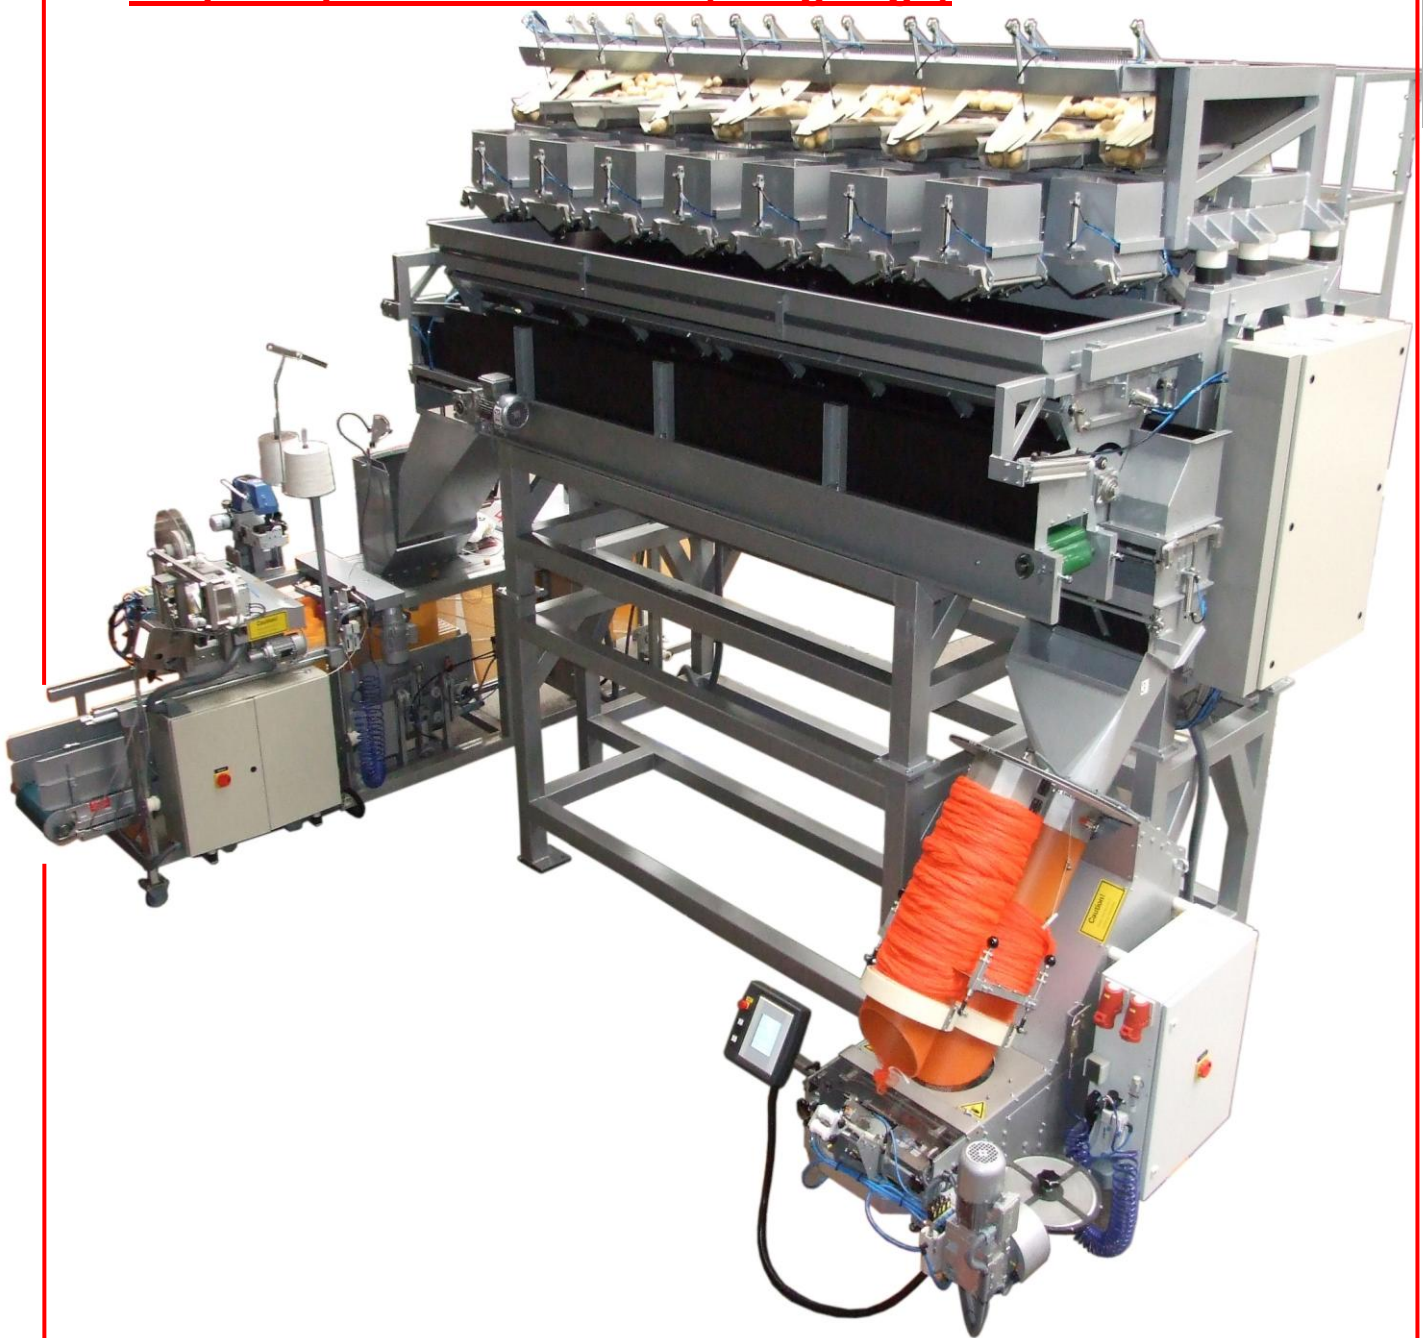

Output: up to 38 tons / hour (25 kg bags)

Upmatic Type 2715 = computer controlled proportioning component weighing machine for fine and coarse products in the food and non-food industries. The weighing range covers, dependent on product, all weight classes from 2,5kgs to 25kgs (higher weights by double dumps).
**- Weighing without loss**.

The Upmatic 2715 convinces by offering both precision and high speed. A feed belt conveys the product to the distributor system. Two vibrating plates ensure that the product is uniformly spread before it moves via fifteen generously sized chutes direct into the weighing containers. Within a few milliseconds the high performance computer then assembles the preset weight, calling up the appropriate quantities of product.

Two collecting belts feeds the batch to the appropriate filling and sealing machine. The Upmatic 2715 operates extremely reliable, with smallest weight tolerances and high capacity.

As real universal weighing machine the Upmatic 2715 is suitable for fine and coarse products in the food and non-food industry, such as onions, potatoes, carrots (cut or cubic), lettuce, grated celery, Brussels sprouts, sweets, or even products like fish or scampi (fresh or deep frozen).

Different programs tailored to specific products enable the machine to be run at high speed while still remaining easy to operate.

upmatic® 2715

The high precision weigher Upmatic 2715 can be combined with all current filling and sealing machines. Upmann also supplies the associated feed belts as well as processing equipment to make up complete high capacity weighing and bagging lines.

The measurements may change according to individual combination with filling and closing machines.

Technical Data:

- Weighing range: 2,5 - 25kgs
- Capacity: 38 tons / hour
  bags of 25 kgs approx. 26 bags/min.
- Power supply: 230/400 V, 50 Hz
- Power consumption: 5,5kW
- Air pressure: 6 bar
- Air consumption: l / cycle
- Weight: kg
- Network connection offers remote maintenance, remote control and further service features.

Type of machines:

Upmatic 2715:

Accessories:

- Feed belts in individual sizes.
- Full indicators
- Chutes
- Collecting belts
- Platforms in individual sizes
