- Piglet savings
- Improved staff performance
- Safe data records

## LISA 2 alerts the staff with vision signal

**Yellow** Farrowing in process

**Red** Check sow

**Green** Farrowing finished

## What the users say...

Per Hulgaard farm manager for 1,100 sows in Denmark: *"we are very pleased with the system - it provides us a much better overview of ongoing farrowings and allows us to save piglets"*.

Robert Woolley, Genetic Manager for 75,000 sows in Russia: *"for us it is a great way to train operators in monitoring sows as they farrow, because our operators do not have a lot of experience and in some cases discipline"*.
